

**J.C. BOSE UNIVERSITY OF SCIENCE AND TECHNOLOGY, YMCA FARIDABAD**

**SCHEME OF STUDIES & EXAMINATIONS**

**Ph.D (ELECTRICAL ENGINEERING) Course Work**

**Session-July-Dec-  
2019**

Course Code	Course Title	L	P	Marks for Sessional	Marks for End Term Examination		Total Marks	Credits
					THEORY	PRACTICAL		
PHD-100A	Research Methodology	4	0	25	75	-	100	4
PHEL01	Advance Power Electronics Converters	4	0	25	75	-	100	4
PHEL 02	Energy Auditing and Conservation	4	0	25	75	-	100	4
	Total	12	0	75	225	-	300	12

Note: Exam duration will be of 3 hours.

## PHD – 100A RESEARCH METHODOLOGY

### *PhD (Common Subject)*

No. of Credits: 4	Sessional:	25 Marks
L   T   P   Total	Theory:	75 Marks
4   0   0   4	Total:	100 Marks
	Duration of Exam:	3 Hours

#### **Course Objectives:**

- Understand research process in order to plan a research proposal
- Learn methods to devise and design a research set-up
- Plan and perform data collection methods and its analysis
- Conclude research in report writing

#### **Course Outcomes: The research scholar shall be able to**

- CO1 Plan a research proposal and design the research.
- CO2 Collect data through experiments or surveys as per research requirement.
- CO3 Understand and apply sampling and sampling distributions.
- CO4 Understand and perform quantitative and qualitative data analysis.
- CO5 Write research report with proper citations.

**Unit 1 Introduction to Research:** Definition, need and purpose of research, types of research, research process, approaches to research, planning a research proposal, literature review.

**Unit 2 Measurement Scales:** Indexes vs. Scales, Types of Scale, construction of Scale, Bogardus social distance scale, Thurstone Scale, Likert Scale, Semantic Differential Scale, Guttman Scale.

**Unit 3 Data Collection Methods:** Experiments and Surveys, Experiments: Classical Experiments, Independent & Dependent Variables, Pre Testing & Post Testing, Double Blind Experiment, Subject Selection, Variation on Experiment Design. Survey Research: Topics appropriate for survey research, Guidelines for asking questions, Questionnaire Construction, Strengths & Weakness of Survey Research, Types of Surveys.

**Unit 4 Sampling:** Types of sampling methods: Non Probability Sampling, Probability Sampling, Theory & Logic of Probability Sampling, Sampling Distributions & Estimates of Sampling Error.

**Unit 5 Data Analysis:** Qualitative v/s Quantitative data analysis, Qualitative Data Analysis: Discovering Patterns, Grounded Theory Method, Semiotics, Conversation Analysis, Qualitative Data Processing. Quantitative Data Analysis: Quantification of Data, Univariate Analysis, Bivariate Analysis, Multivariate Analysis, Regression Analysis, Description Analysis. Hypothesis. Multiple Attribute Decision Making.

**Unit 6 Report Writing, Ethical Issues and Outcomes:** Report Preparation, Structure of Report, Report Writing Skills, Citations, Research Papers, Intellectual Property Rights, Plagiarism, Patent, Commercialization, Ethical Issues.

<b>PHEL 01</b>	<b>ADVANCED POWER ELECTRONIC CONVERTERS</b>	<b>4L:0T:0P</b>	<b>4 Credits</b>
----------------	---	-----------------	------------------

**Course Outcomes:**

Students will be able to:

1. Analyze the operation of DC to AC converters
2. Understand the concept of space vector modulation
3. Examine and analyze the concept of switched mode power supplies
4. Analyze the working of Resonant converter topologies
5. Design and understand the multilevel inverters and their applications
6. Apply the concept of Advanced power electronic converters in various applications

<b>Syllabus</b>	
<b>Unit</b>	<b>content</b>
<b>1</b>	<ul style="list-style-type: none"> <li>• DC to AC converters: Basic operation and working</li> <li>• Pulse width modulated inverters</li> <li>• Single pulse width modulation</li> <li>• Multiple pulse width modulation,</li> <li>• Sinusoidal Pulse width modulation</li> </ul>
<b>2</b>	<ul style="list-style-type: none"> <li>• Advanced Modulation Techniques:</li> <li>• Space Vector Modulation</li> <li>• Space vector transformation</li> <li>• Concept of space vector</li> <li>• Time Averaging of reference vector</li> </ul>
<b>3</b>	<ul style="list-style-type: none"> <li>• SMPS: Modes of operation Push-Pull and Forward Converter Topologies Voltage Mode Control.</li> <li>• Half and Full Bridge Converters</li> </ul>
<b>4</b>	<ul style="list-style-type: none"> <li>• Introduction to Resonant Converters.</li> <li>• Load Resonant Converter. Zero Voltage Switching and zero currentswitching converter Topologies.</li> <li>• Resonant DC Link Inverters</li> </ul>
<b>5</b>	<ul style="list-style-type: none"> <li>• Multi-level inverters, advantages,</li> <li>• configurations: Diode clamped, Flying capacitor and cascaded Multi-level inverters, applications.</li> </ul>
<b>6</b>	<ul style="list-style-type: none"> <li>• Applications of power electronic converter: UPS, Induction heating ,HVDC Transmission system</li> <li>• Few power electronic circuits used in practice for controlling electric drives.DC-DC Converters for various renewable energy conversion.</li> <li>• GATE Driver Circuits</li> </ul>

<b>PHEL 02</b>	<b>Energy Auditing and Conservation</b>
<b>L T P Cr</b> <b>4 0 0 4</b>	<b>Sessional-25</b> <b>End Sem-75</b> <b>Total-100</b>

<b>Course Objectives:-</b> Students will be able to:		
1. To revive energy scenario, energy sources, energy utilization and energy efficiency.		
2. To understand different terms and types of energy audit.		
3. To identify energy conservation measures in different sector.		
4. To prepare energy audit reports.		
<b>UNITS</b>	<b>CONTENT</b>	<b>HOURS</b>
1	Sources of Energy: Energy resources, Stored & running resources, Non- Conventional energy sources, Necessity of conserving resources, Cogeneration- Types of schemes.	6
2	Energy in Industries: Energy inputs in industry, Comparison of various energy inputs, use of electric energy in industries for motive power, Electric Water heating, Solar Water heater, Water treatment Plant& Efficient treatment Plant load. Fire fighting Pump loads, Air-conditioning & Refrigeration	8
3	Transformer Loading/Efficiency analysis Feeder/cable loss evaluation, case study, Reactive Power management-Capacitor Sizing-Degree of Compensation-Capacitor losses, Location-Placement Maintenance ,Case study	6
4	Energy Audit: Audit, A prerequisite for energy conservation, Principles of Energy Audit, Measurement & measuring devices, Analysis of data, Flow diagram, its use, ABC Analysis	6
5	Energy conservation in Utilities: Energy conservation in generation, transmission, distribution & utilization, Demand side energy Management, Energy efficient lighting system, Energy efficient drives- critical study & analysis of certain case studies.	6
6	Economics of Energy Conservations: Energy Conservation: Energy Conservation using energy audit data, Principles of energy conservation in industrial, commercial, domestic agricultural & municipal sectors. Planning, Implementation & monitoring of energy conservation project, payback period calculations.	8

### **Suggested reading:**

1. Sukhatme S.P., 'Solar Energy : Principles of thermal collection and storage' Tata- McGraw Hill
2. Keth & Fetcher, 'Energy Efficiency Handbook' CRC Publication.
3. Sinha H.P., 'Power System- I' Khanna Publication.
4. Anthony J. Pansini, Kenneth D. Smalling, .Guide to Electric Load Management., PennwellPub; (1998)
5. Howard E. Jordan, .Energy-Efficient Electric Motors and Their Applications., Plenum PubCorp; 2ndedition (1994)
6. Giovanni Petrecca, .Industrial Energy Management: Principles and Applications., TheKluwer international series -207,1999
7. Handbook on Energy Audit and Environment Management , Y P Abbi and Shashank Jain,TERI,2006

8. Handbook of Energy Audits Albert Thumann, William J. Younger, Terry Niehus, 2009

**Course Outcomes:-**Students will be able to:

1. Acquire the background required for engineers to meet the role of energy managers and to acquire the skills and techniques required to implement energy management
2. Identify and quantify the energy intensive business activities in an organization
3. Able to perform Basic Energy Audit in an Organization
