CHAIRPERSON  
**DR. RADHIKA SHARMA**  
COORDINATOR

Prof. Umesh Arya took the stage and delivered a comprehensive talk on the Indian Knowledge System (IKS), elaborating on its philosophical, scientific, and managerial aspects. He discussed the relevance of Vedic wisdom, Ayurveda, ancient economic principles, and ethical business practices derived from scriptures like the Arthashastra and Bhagavad Gita. He explained how these time-tested principles could be applied in modern business environments to enhance leadership, strategic planning, and ethical governance.

The Indian Knowledge System (IKS), or Bhāratīya Jñāna Paramparā, refers to a vast and multifaceted collection of knowledge, traditions, and philosophies that have been developed and passed down through generations in the Indian subcontinent. It encompasses diverse domains like science, technology, arts, literature, philosophy, culture, and medicine, including practices like Ayurveda and Yoga. IKS is not a single discipline but a holistic approach to understanding the world and living in harmony with it, emphasizing a deep understanding of human beings and nature.

The lecture was interactive with students actively engaging in discussions. Prof. Arya addressed various questions on the applicability of ancient Indian knowledge in contemporary corporate practices. He provided real-world examples where traditional wisdom has been successfully incorporated into modern industries.

The session concluded with a vote of thanks by Dr.Radhika Sharma, who expressed gratitude to the speaker for his valuable insights and to the participants for their enthusiastic involvement. She emphasized the significance of such academic engagements in bridging the gap between historical knowledge and present-day business dynamics.

The expert lecture was highly appreciated by attendees, leaving them with a deeper understanding of the rich Indian Knowledge System and its potential in shaping future business strategies. The event successfully met its objective of promoting awareness and integration of indigenous wisdom into academic and professional domains.
