

Report on the Seminar on The Future in HR

The Department of Management Studies from J.C. Bose University organized a knowledgeable seminar on **The Future in HR** for MBA students on 20th February, 2025 from 11am to 1pm. This seminar, aimed to impart knowledge about the HR field of Management Studies, its role in the future and how the students of MBA can upskill themselves to grab upcoming opportunities in the field of Human Resource. The program started with the introduction of the speaker, Mrs. Isha Vashishta (Alumni, Department of Management Studies) by Ms. Akansha Bhardwaj. Isha Vashishta has an experience in the field of Human Resource Industry of more than 6 years. She started the lecture with the brief introduction of the Human Resources domain of management and also mentioned the various dimensions in HR domain which students can opt for in their career ahead. She gave the useful insights about the current trends being followed in the domain and familiarized the students with some software like MS Excel, PowerBI, SQL, etc. being used in the industry which students must learn to excel in the field.

She also mentioned some online learning platforms like Mygreatlearning.com, freecodecamp, Google coursera, etc. which students can use to learn practical skills online without paying any fee which will help students in enhancing their skills, CV and also performing well in the interviews.

It was a very friendly session where students freely asked their doubts with the speaker which were answered by the speaker in a very comprehensive and polite manner.

At the end of the session, vote of thanks was proposed by faculty coordinators and student coordinators. Dean, Department of Management Studies, Prof. Ashutosh Nigam and Chairperson, Dr. Rachna Agarwal greeted the speaker with Holy Tulsi sapling and added their useful thoughts that students must connect with alumni and learn from their experience.

The seminar was a great success, teaching students about how to excel in the field of HR. They also learnt about some tools to be learned and about the platforms from where they can learn them.
