Ref: Notification No. 04/05/2025/Acad/1962 to 2018 dated 07.02.2025

It has come to attention that the subject **BSC-103D, Mathematics-I (Calculus and Linear Algebra)** was listed under multiple schemes for the 1st semester of B.Tech programmes. This subject was also associated with an alternative code, **BSC-103A**, creating inconsistency across departments.

Additionally, the **ECE Department** has pointed out that the syllabus currently assigned under subject code **MTU-145-V** does not align with the content followed in other departments.

In view of this, the subject code for **Mathematics-I (Calculus and Linear Algebra)** in the 1st semester for the following B.Tech programmes:

- Electronics and Communication Engineering (ECE)
- Electronics Engineering with IoT (EE-IoT)
- Electronics and Computer Engineering

Has been **rectified and reassigned** as: **MTU-147-V**

All concerned departments / faculty members and office of the COE are requested to **update their records accordingly**.

The same has been updated on the e-SAMART Portal by Academic Branch.
