Detailed Activity Report	<p>The first lecture was delivered by Dr. Neelam Turk on topic “Evolution of Wireless Generations”. She has delivered his talk successfully by exploring the evolution and development of various generations of mobile wireless technology. Mobile wireless communication system has gone through several evolution stages in the past few decades after the introduction of the first generation mobile network in early 1980s. Due to huge demand for more connections worldwide, mobile communication standards advanced rapidly to support more users. The mobile wireless Generation (G) generally refers to a change in the nature of the system, speed, technology, frequency, data capacity, latency etc. Each generation have some standards, different capacities, new techniques and new features which differentiate it from the previous one.</p> <p>The faculty members, workshop staff, research scholars and PG students of the electronics department have attended this lecture.</p>
